Innovative Web Developer with 4 years of experience creating impactful and user-friendly websites and applications. Specializes in crafting immersive front-end experiences, including 3D websites, and is passionate about modern web standards and cutting-edge development techniques. Proven ability to deliver successful projects from concept to deployment.

Education

Don Honorio Ventura State University   2021 – Present

Bacolor, Pampanga, Philippines   Bachelor of Science in Information Technology

Magna Cum Laude — GWA: 1.4414

https://dhvsu.edu.ph/

La Verdad Christian College   2019 – 2021

Apalit, Pampanga   Information and Communication Technology

Projects

Terrifying Truth of a Stagnant Individual   May 31 – Present

The personal site and portfolio of nowhere in particular web developer Henry Kaye

https://henrykaye.vercel.app

Designed, engineered, and deployed this portfolio website from scratch using NextJS, GSAP, TailwindCSS, and TypeScript.

It's got a subtle newspaper-vibe-inspired portfolio. Take a look and enjoy!

Tatak Siklista   April 2024 – Jan 30 2025

Project Full Stack Developer

https://tatak-siklista.web.app/

- Led the development of a full-stack bike customization platform, enhancing user experience with interactive 3D models. Used Firebase for backend integration, including database, storage, and deployment.

Netflix Clone   January 2025

Project Full Stack Developer

https://netflix-henrykaye.onrender.com/

- The backend is powered by **Node.js** and handles user authentication via **jsonwebtoken** with **cookie-parser** for secure cookie management. **Mongoose** is used for managing data with **MongoDB**, ensuring scalable storage for user data, watch history, and more.

- The **frontend** is crafted with **React** and **Vite**, ensuring fast and responsive performance. **React Router DOM** is used for smooth navigation across multiple pages, while **Zustand** provides a simple and efficient state management solution for global variables and functions.
