Projects

Portfolio Website Designed, engineered, and deployed this portfolio website from scratch using NextJS, GSAP, TailwindCSS, and TypeScript. It's got a subtle newspaper vibe inspired portfolio. Take a look and enjoy! https://henrykaye.vercel.app	May 2025	Tatak Siklista - 3D Bike Customization Website Led the development of a full-stack bike customization platform, enhancing user experience with interactive 3D models. Used Firebase for backend integration, including database, storage, and deployment. https://tatak-siklista.web.app/	April 2024 - January 2025
Netflix Clone Website Built a full-stack Netflix clone using Node.js, MongoDB (Mongoose), and JWT for secure authentication with cookie management. The frontend was developed with React and Vite, utilizing React Router DOM for navigation and Zustand for state management. https://netflix-henrykaye.onrender.com	January 2025	Simple Blog Website Developed a full-stack blog application using React for the frontend and Redux for state management. Integrated Supabase for backend services, including authentication and real-time database functionality, enabling users to create, read, update, and delete blog posts efficiently. https://simple-blog-react-redux-supabase.vercel.ap p/	January 2026
